

## PRESS RELEASE

# Advancing 'Health for All' through Telemedicine: Intelehealth joins Digital Public Goods Alliance

**July 04, 2022** : Last week, Intelehealth was added to the Digital Public Goods Alliance [DPG Registry](#). This underscores Intelehealth's commitment to the development and championing of digital public goods that will help achieve 'Health for All' and contribute to the Sustainable Development Goals (SDGs).

Intelehealth is an open-source telemedicine software platform built as a Digital Public Good for telemedicine. A tech-for-impact organization that assists Governments and Non-profits in implementing high-quality telemedicine projects. We have piloted various use cases like primary health care, RMNCH, elderly care, NCD management using telemedicine. We have executed projects in multiple countries like India, Philippines, Kyrgyzstan, and Haiti.

Our mission is to "Deliver quality healthcare where there is no doctor".

Our vision is "Health for all", we believe in the vision of universal health coverage - that you should be able to receive the health services you need, when and where you need them, without facing financial hardship.

For us, being recognized as a digital public good - defined as open source software, open data, open AI models, open standards and open content that adhere to privacy and other applicable laws and best practices, do no harm, and help attain the SDGs.

*"This recognition acknowledges Intelehealth's commitment to providing high-quality healthcare for the last mile population through Telemedicine and to closing the digital divide between urban and rural populations through affordable access to digital technologies, digital literacy, and digital public goods," said **Intelehealth CEO & Co-founder, Dr. Neha Verma.***

The Digital Public Goods Alliance is a multi-stakeholder initiative endorsed by the United Nations Secretary-General, working to accelerate the attainment of the Sustainable Development Goals in low- and middle-income countries by facilitating the discovery, development, use of, and investment in digital public goods.
